Testimonials

It was an amazing course from an amazing business school. This course is for anyone who knows the importance of writing and wants to improve on their writing skills. Thank you so much for your very valuable training. I really enjoyed the class, and appreciated that you made it fun. Thank you for sharing your wealth of wisdom, experience and personable presentation with us. Hope to attend more of your training in future.

Funke Ajao

I learned about business letters and also about the type of memo we have in writing letters.

i also learnt about the external and internal audience ,about the kind of tone one needs to use in an email, the languages and the sentence as well.

Lastly, i want to thank the host ICLED for this kind of opportunity given to me and my colleagues, I have learned some words and gained some experience during the three days of the training.

Adetayo Adebajo

PLANT MANAGER, ECOGAS LPG

The webinar was on the application of AI in Business Decision Making. The Facilitators have a good grasp and sound understanding of the subject matter. Examples were drawn from Engineering, Sciences, Agriculture and Business Environment. The simplicity of delivery and interactive nature of the webinar kept participants busy all through the session. I believe, Our University will never remain the same with respect to application of AI in specific areas of Our Sustainable Development Goals Drive. Thank You Professor FAMILONI. Thank you ICLED Group. Looking forward to a more interactive session with your Team.
